

Anas Bin Abid

DAE Electrical Engineer | Electrical Technician | Building Wiring | Fire Safety Trained

Abbottabad, Khyber Pakhtunkhwa, Pakistan | 0370 5218259 | anasawan1255@gmail.com

PROFESSIONAL SUMMARY

DAE Electrical Engineering graduate from Government College of Technology, Abbottabad, with hands-on experience in residential and commercial electrical wiring, installation, testing, and troubleshooting. Skilled in conduit work, cable pulling, lighting, switches, sockets, and basic distribution systems. Certified in Fire Fighter-I and Fire Fighter-II through Civil Defence, with knowledge of workplace safety, emergency response, and hazard prevention.

EXPERIENCE

Independent Residential Electrical Contract | Electrical Wiring Technician

Feb 2026 – Feb 2026

Abbottabad

- Completed the full electrical wiring of a residential house under a private contract.
- Installed conduits, pulled and routed cables, and fitted switches, sockets, lighting points, and other electrical accessories.
- Supported distribution-board connections, circuit identification, basic load planning, and final testing.
- Checked electrical points for continuity, correct connections, insulation concerns, and safe operation before handover.
- Managed tools, materials, daily work, and coordination with the house owner and other construction workers.
- Applied safe working practices, including isolation awareness, proper tool handling, and maintaining a clear work area.

Abbottabad International Medical Institute | Electrical Wiring Technician

Nov 2025 – Jan 2026

Abbottabad

- Worked on electrical installation activities for a newly constructed building or block.
- Assisted with conduit placement, cable routing, lighting points, switchboards, sockets, and electrical fittings.
- Supported senior electricians during wiring, connection, circuit testing, and fault-checking activities.
- Followed site instructions, electrical safety requirements, and construction-site work procedures.
- Coordinated with electricians and other construction workers to complete electrical tasks according to building progress.
- Maintained awareness of fire hazards, emergency access, housekeeping, and safe material handling on-site.

Government College of Technology, Abbottabad | Electrical Wiring Technician

Mar 2025 – Sep 2025

Abbottabad

- Worked for seven months on electrical installation in a newly constructed section or block of the college.
- Performed practical electrical work after college hours while continuing the DAE Electrical Engineering diploma.
- Assisted with conduit installation, cable pulling, lighting circuits, switches, sockets, electrical fittings, and connection work.
- Used electrical hand tools and testing equipment under site supervision.
- Helped identify and correct wiring issues during installation and testing.
- Developed practical understanding of building wiring layouts, site coordination, material handling, electrical safety, and compliance with supervisor instructions.

Call Center | Call Center Agent

Dec 2024 – Feb 2025

Abbottabad

- Handled customer calls and responded to basic customer questions and concerns.
- Developed communication, listening, problem-solving, and customer-handling skills.
- Worked with team members to manage daily call targets and customer records.
- Maintained a professional attitude while dealing with different types of customers.

PROJECTS

Complete Residential House Wiring

- Installed wiring routes and electrical points according to the house layout.
- Completed switch, socket, light, and other electrical fitting work.
- Checked completed circuits for correct connection and safe operation.
- Managed the work as a small private contract near his residence.

Government College New Block Electrical Work

- Supported electrical installation work during the diploma period.
- Worked on conduit, cable, lighting, switches, sockets, and electrical fittings.
- Followed instructions from senior technical staff and site supervisors.
- Improved practical knowledge of construction-site electrical work.

Abbottabad International Medical Institute New Building Electrical Work

- Assisted with wiring and electrical fitting work for the new construction area.
- Worked with other electricians and construction workers on-site.
- Supported testing, checking, and correction of electrical points.
- Followed electrical safety and site coordination requirements.

EDUCATION

Government College of Technology, Abbottabad Diploma of Associate Engineering (DAE) in Electrical Engineering	2026
Fauji Foundation Model School Abbottabad Matriculation in Computer Science	2023

TECHNICAL SKILLS

Electrical Installation: Residential Wiring, Building Wiring, Conduit Installation, Cable Pulling, Cable Routing, Lighting Points, Switches, Sockets, Electrical Fittings, Circuit Connections, Basic Distribution Board Support

Electrical Testing and Maintenance: Basic Troubleshooting, Fault Checking, Continuity Checking, Circuit Inspection, Connection Verification, Replacement of Electrical Fittings, Basic Repair Work, Safe Isolation Awareness

Fire Safety and Emergency Response: Fire Prevention, Basic Firefighting, Fire Extinguisher Awareness, Emergency Response, Evacuation Procedures, Hazard Identification, Fire Risk Awareness, Incident Reporting, Personal Protective Equipment, Emergency Coordination

Safety and Regulations: Electrical Safety Practices, Workplace Safety Procedures, Construction-Site Safety, Safe Tool Handling, Basic Risk Assessment, Housekeeping, Material Handling, Following Supervisor Instructions, Compliance with Site Rules, Basic Safety Documentation Awareness

Technical Knowledge: Electrical Circuit Fundamentals, House Wiring Layouts, Basic Load Distribution, Single-Phase Wiring, Basic Distribution Board Concepts, Electrical Drawing Basics, Lighting and Power Circuits

Workplace Skills: Teamwork, Communication, Customer Handling, Problem-Solving, Time Management, On-Site Coordination, Responsibility, Discipline, Ability to Work Under Supervision
